TRAVERSING WALL CATALOGUE

Icon Key

Cost

Just to give you a rough idea.

Outdoors

This wall is free range; it lives out in the fresh air.

Indoors

This wall likes to keep dry.

Matting

Recommended for this system.

What the Head Teacher needs to know...

1

Safety

Safety flooring is not a legal requirement as the footholds are less than 600mm from the ground, as set out in: BS EN 1176 & BS EN 1177 Children's Playground Equipment and Surfacing. However we do recommend some form of attenuated flooring for free-standing traversing walls as there is a risk of children climbing on top of the structure.

2

Physical Exercise Targets

With the drive to encourage children into more physical exercise and active participation in Outdoor Activities, Traversing Walls fulfill all the criteria set out in educational and government aims. Climbing is now going to be an Olympic Sport for the first time in 2020.

3

Development

Traversing walls help children develop balance, confidence, coordination, problem-solving skills, teamwork, trust and strength. Such a resource can help develop an interest in the wider world of outdoor adventure. The longer the traversing wall the greater the challenge and the more children love them!

4

Longevity

Your traversing wall's long life span, combined with its endlessly challenging and engaging activity makes them fantastic value for money as an investment in people. They can be varied and upgraded to continually add new interest and challenges to each generation of children.

5

Supervision

Staff do not need special qualifications and in general a traversing wall does not require supervision.

6

School Dynamics

Bright coloured walls draw the children in, offering unlimited individual and group play and games. Competition is king as they make progress along the three coloured climbing challenges. We have also had feedback from many Schools highlighting that our Traversing Walls have helped to improve the profile of their schools.

7

Great Value

Traversing walls are an unbeatable value for money addition to your school, club or scout hall indoor or out.

How do we stand out?

We make Climbing and Traversing Walls, because we love climbing and want to share it! From the office staff to the challenge creators we are all climbers. This means we know what makes enticing and rewarding challenges for your pupils.

We employ craftspeople

Your wall is not flat packed. Every wall is made to order and tailored on site where our craftspeople will finish it beautifully.

No two walls will have the same challenges

Every single installation is unique, every coloured challenge is created by someone who is a professional challenge setter – not many Playground companies can claim that?

We have high standards

All our walls are built to the appropriate European Standard: BS EN 12572 for climbing walls and climbing holds. BS EN 1176 and 1177 for playground equipment.

Our materials are simply better

Responsibly sourced longlife timbers, all FSC or PEFC certified. Highest quality Fischer and Hilti products are the norm.

Redwood Wall Mounted Traversing Wall

One of our most popular walls. This versatile system can be fitted to almost any wall from brick and concrete to Victorian stone. **This system is tailored to fit your wall;** around windows, drainpipes and anything else you want to throw at us!

Indoor Traversing Wall

A great addition to your gym or Scout hut. Removable volumes enhance the 3D experience. Hanging Mats serve several functions. They protect gym users from any unpleasant impacts with the wall when it is not in use. They also help to deter unauthorised access when the wall is not in use. And finally they provide a soft surface to land on. Use our Options to add an additional challenge line to cater for broad age ranges from 5 to 16.

Panels	Length	Cost	Hanging Mats
5	6.1m	£2818.85	£1650.00
6	7.32m	£3382.62	£1980.00
7	8.54m	£3946.39	£2310.00
8	9.76m	£4510.16	£2640.00

£563.77 per panel **£330.00** hanging mat

Testimonials

"We would like to say a huge thank you for the Climbing Wall. The children & teachers love it! Once again many thanks."

**From the children and staff of
St. Peter's CE Primary**

"Climbing Wall Solutions provided a fast, efficient and friendly service. The children are delighted with the wall which they say is more colourful and more fun than they expected. We particularly like the fact that there is a choice of routes providing challenge. I would thoroughly recommend Climbing Wall Solutions for any school playground installation."

**Jo Osborne, Headteacher,
The Bishops' Primary School**

Bishop Road School has 780 primary school children and is one of the largest primary schools in the South West.

"We have worked closely with Climbing Wall Solutions for many years firstly with installing our indoor and outdoor climbing walls. Now they advise on safety inspections and general upkeep.

We have found many of our visitors who come to the school are amazed at the climbing walls. They have had a massive impact improving our children's coordination skills and helping increase self-esteem. It is one of the best investments and we would argue extremely good value for money.

The service has been outstanding and the quality of the product is exemplary. If you want something with a 'wow factor' then climbing walls have these in 'spades'. I would suggest this is a great product for a PTFA or equivalent to raise funds for in a school.

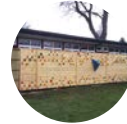

**Thomas Powe, Systems and Services Manger,
Bishop Road School, Bristol**

"Our climbing wall is now installed and the children are very excited about using it for the first time this lunchtime! I just wanted to say how wonderful your installers were, and how polite and accommodating they were. It was a pleasure to meet them both!"

**Anna Raine, School Secretary,
Empingham CE Primary School**

"Climbing Solutions are quick to respond to enquiries and very efficient and quick in installation. I would recommend them unreservedly for others who are looking at providing an excellent play facility for all age groups that develops new skills, co-ordination and provides exercise whilst using minimum space."

**Rev Alan Bain,
Vicar of St Philip and St James Church, Bath**

"My sincere thanks for a great job done here in Jersey. Your two route setters were fantastic. Grainville School always appreciates working with highly professional companies. Your cooperation and support re delivery and installation around a tight timeframe to meet our needs reflects the outstanding customer care policy of your company."

**John McGuinness, Headteacher,
Grainville School, Jersey**

I just wanted to wait until the children were back and using the new wall before writing to you. The wall is fantastic and the children love it – of course. It looks spectacular. There are regular queues now – for the moment we have queues at either end and they only get to do one side at a time to maximise the access because we are finding some of the children take a while to negotiate the first board when they've not climbed before.

Re: install Sean and Jake were fab – Jake was a good sport and responded positively to my request to him to demo for me the techniques needed to be passed on to the children. The lady from my PTA, Jo Degregorio, is equally pleased too.

Jane Harrower,
Bevendean Primary School

I was highly impressed with the work of Climbing Wall Solutions from our first interaction to the completion of the project. Their communication was excellent and the project ran very smoothly. I was similarly impressed with their knowledge and experience which reassured me that our wall would be of the highest quality.

They were very flexible with dates which enabled us to get the project completed at fairly short notice and with minimum fuss. The final result is brilliant; all of our primary aged children are challenged by the colour coded climbing routes and the wall has become a very popular addition to the play activities on offer at Northleaze. I would recommend any school looking at installing a climbing wall to consider Climbing Wall Solutions as our experience was first-class!"

Steve Davis,
Northleaze Primary School
